**AUG 15 2000**

IN RE: Petitioner:  
Beneficiary:

Petition: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

IN BEHALF OF PETITIONER:

**Public Copy**

data deleted to  
prevent clearly unwarranted  
invasion of personal privacy

**INSTRUCTIONS:**

This is the decision in your case. All documents have been returned to the office which originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information which you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office which originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER,  
EXAMINATIONS

Terrance M. O'Reilly, Director  
Administrative Appeals Office

**DISCUSSION:** The nonimmigrant visa petition was denied by the director and is now before the Associate Commissioner, Examinations, on appeal. The appeal will be sustained.

The petitioner seeks to employ the beneficiary as a "Application Software Analyst/Programmer I" for a period of two years. The director determined the petitioner had not established that the offered position is a specialty occupation or that the beneficiary qualifies to perform services in a specialty occupation.

On appeal, the counsel states that the position, Analyst/Programmer, is a specialty occupation because it requires at least a Bachelor's Degree plus additional training and experience. Counsel further states that this beneficiary meets those requirements.

Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1101(a)(15)(H)(i)(b), provides in part for nonimmigrant classification to qualified aliens who are coming temporarily to the United States to perform services in a specialty occupation. Section 214(i)(1) of the Act, 8 U.S.C. 1184(i)(1), defines a "specialty occupation" as an occupation that requires theoretical and practical application of a body of highly specialized knowledge, and attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to section 214(i)(2) of the Act, 8 U.S.C. 1184(i)(2), to qualify as an alien coming to perform services in a specialty occupation the beneficiary must hold full state licensure to practice in the occupation, if such licensure is required to practice in the occupation. In addition, the beneficiary must have completed the degree required for the occupation, or have experience in the specialty equivalent to the completion of such degree and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(B), the petitioner shall submit the following with an H-1B petition involving a specialty occupation:

1. A certification from the Secretary of Labor that the petitioner has filed a labor condition application with the Secretary,
2. A statement that it will comply with the terms of the labor condition application for the duration of the alien's authorized period of stay, and
3. Evidence that the alien qualifies to perform services in the specialty occupation.

The petitioner has provided a certified labor condition application and a statement that it will comply with the terms of the labor condition application.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

1. Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
2. Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
3. Hold an unrestricted State license, registration, or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
4. Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The record shows that the beneficiary was awarded a Bachelor of Electrical Engineering degree from the University College of Engineering in Burla, India, in 1996. The petitioner has provided an evaluation of the beneficiary's education by an evaluation service which states that the beneficiary's foreign education is equivalent to a bachelor's degree in electrical engineering from an accredited university in the United States. It is determined the beneficiary is qualified to work in a specialty occupation as a software analyst and programmer on the basis of the education he has attained.

The term "specialty occupation" is defined at 8 C.F.R. 214.2(h)(4)(ii) as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge to fully perform the occupation in such fields of human endeavor, including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and

which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
3. The employer normally requires a degree or its equivalent for the position; or
4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The record indicates that the beneficiary would be working at a firm named [REDACTED] in Cincinnati, Ohio. The duties of the offered position are described as follows:

[REDACTED] will be a team member and will be responsible for implementation of maintenance repair overhaul (MRO) package at [REDACTED] servicing units, working on the module of Oracle Purchasing. His responsibility will be to understand the site requirements, analyze site specific requirements for changes and incorporate those specific changes. The responsibilities include system testing of the interfaces between MRO and legacy systems. He will also resolve the queries raised by various sites on the function of the MRO product.

He will be responsible for executing the architecture for all the interfaces, coding all the assigned programs and interfaces to completion according to plan and schedule. He will ensure programs are as per the functional specifications. He will identify risks, assess, monitor and control risks and ensure that development adheres to established standards.

He will work directly under the supervision of onsite project manager for successful and timely implementation of MRO package. He will be involved in unit testing, system testing and interface testing. He will ensure configuration control of source code and other deliverables during development.

The offered position appears to be that of a computer systems analyst. The Department of Labor's Occupational Outlook Handbook, 2000-2001 edition, at pages 111-112 finds that the usual requirement for employment as a computer scientist or engineer is a baccalaureate degree in computer science, information science, or management information systems. In view of the foregoing, it is concluded that the petitioner has demonstrated that the offered position is a specialty occupation within the meaning of regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. 1361. The petitioner has sustained that burden. Accordingly, the appeal will be sustained and the petition will be approved.

**ORDER:** The appeal is sustained. The director's order is withdrawn and the petition is approved.
